

**TOURETTE SYNDROME
AWARENESS WEEK
MAY 1st to 7th 2011**

Do you know someone who constantly repeats a meaningless movement or sound? Someone who blinks, sniffs, shouts, shakes their head, clears their throat, twirls their hands or similar?

Chances are that person has **TOURETTE SYNDROME**, and he or she probably doesn't know it!! This neurological condition affects thousands of Australians – and most of them have no idea. They battle with the distressing aspects of their disorder, unaware that help, support and understanding are just a phone call away.

Most affected are those children who cannot cope with symptoms and often have learning problems as a result. TSAA is offering every primary school in Australia a *free* copy of our DVD, "*What is Tourette Syndrome?*" We understand that early diagnosis creates much better outcomes. Let your school know of this initiative for Tourette Syndrome Awareness Week 2011.

Help increase awareness of this disorder so people with **TOURETTE SYNDROME** can find greater acceptance and understanding in our community. To learn more, contact:
